

Westdeutsches
Protonentherapiezentrum
Essen gGmbH

Westdeutsches Protonentherapiezentrum Essen (WPE) gGmbH, a 100% daughter of the renowned University Hospital of Essen, located in the middle of the Ruhrian Region, Germany, is seeking a dynamic and experienced

Medical Physicist

Responsibilities of the successful candidate include:

- Preparation and conduction of the acceptance tests of the proton therapy equipment
- Commissioning of the proton therapy and medical imaging equipment.
- Implementation and maintenance of patient and facility based quality assurance programs.
- Supervision of the physical aspects of clinical treatment including radiation protection issues.
- Collaboration with the Department of Radiotherapy of the University Hospital of Essen.
- Depending on candidate assignment and interest, clinically applied research is encouraged and supported.

The successful candidate must have a graduate level degree in physics, (M.S., Dipl. Phys., or higher). No prior experience in proton therapy is required. Experience in therapeutic or diagnostic medical physics is preferred.

WPE provides a fully equipped proton therapy center with a proton beam scanning technology from IBA, three gantries and one combined horizontal and eye-treatment fixed beam room. The first patient treatment is scheduled late 2010. Salary is related to the responsibility of the position and the experience of the successful candidate.

The position is open with immediate effect. WPE is an equal opportunity employer. Women and physically handicapped are particularly encouraged to apply.

For further information and/or a visit please contact Dr. Jonathan Farr, Chief Medical Physicist, under +49 201 7231804 or jonathan.farr@uk-essen.de.
